ASX Release

Worley awarded EPC contract by Pembina for the Heartland Extraction Plant

Worley Limited (ASX: WOR) ("Worley") has been awarded a contract by Pembina Infrastructure and Logistics LP (Pembina) to provide engineering, procurement, fabrication and construction (EPFC) services for the Heartland Extraction Plant in Strathcona County, Alberta, Canada.

The Heartland Extraction Plant is designed to process up to 21.2 million standard cubic meters per day of natural gas. The facility will extract natural gas liquids from the Yellowhead Pipeline and is scheduled to begin operations in late 2029.

The construction-led project will be delivered by an integrated EPFC team from Worley's Alberta locations.

"This award is further evidence of Worley's expertise in delivering integrated gas projects and continues our long-standing relationship with Pembina, reflecting their ongoing confidence in Worley as a full project delivery partner" said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
